

TAILORED DATA SCIENCE TRAINING

MOVING TO R DOESN'T HAVE TO BE DIFFICULT

THE CHALLENGE:

NHS Scotland wanted to move from SPSS and SAS to R, and therefore needed to train over 200 data scientists.

THE PROJECT:

JR created tailored R courses around the {tidyverse}, which they delivered across multiple dates. RStudio Workbench was hosted in the cloud, to avoid installation issues. We also provided 1-1 consultancy for two weeks after the course.

THE RESULT:

Moving a large organisation over to R is always challenging. JR were able to lay the foundation for reproducible pipelines, and develop best practices with the NHS Scotland data scientists.
